(Volume 10)

Bell, John F. Generalizability Theory: The Software Problem, 1:19

Blair, R. Clifford (with Higgins, James J.). A Comparison of the Power of the Paired Samples Rank Transform Statistic to That of Wilcoxon's Signed Ranks Statistics, 4:368

Brewer, James K. Behavioral Statistics Textbooks: Source of Myths and Misconceptions, 3:252

Hanna, Gila (with Lei, Hau). A Longitudinal Analysis Using the Lisrel-Model With Structured Means, 2:161

Holland Paul W. (with Thayer, Dorothy T.). Section Pre-Equating in the Presence of Practice Effects, 2:109

Huberty, Carl (with White, David, and Wolins, Leroy). A Special Issue on the Teaching of Statistics, 3:171

Huck, Schuyler W. (with Clark, Sheldon B., and Ranney, Gipsie B.). Estimating the Probability of Success for Classroom Demonstrations in Statistics, 3:239

Huynh, Huynh (with Casteel, Jim). A Comparison of the Minimax and Rasch Approaches to Set Simultaneous Passing Scores for Subtests, 4:334

Jarjoura, David. Tolerance Intervals for True Scores, 1:1

Jarjoura, David (with Kolen, Michael J.). Standard Errors of Equipercentile Equating for the Common Item Nonequivalent Populations Design, 2:143

Kraemer, Helena Chmura. A Strategy to Teach the Concept and Application of Power of Statistical Tests, 3:173

Maxwell, Scott E. (with Delaney, Harold D., and Manheimer, Jerry M.). ANOVA of Residuals and ANCOVA: Correcting an Illusion by Using Model Comparisons and Graphs, 3:197

Muthén, Bengt. A Method for Studying the Homogeneity of Test Items With Respect to Other Relevant Variables, 2:121

Muthén, Bengt (with Lehman, James). Multiple Group IRT Modeling: Applications to Item Bias Analysis, 2:133

Noether, Gottfried E. Elementary Estimates: An Introduction to Nonparametrics, 3:211

Peres, Clovis A. (with Morettin, Pedro A., and Narula, Subhash C.). Educating and Training Undergraduate Applied Statisticians, 3:283

Raudenbush, Stephen W. (with Bryk, Anthony S.). Empirical Bayes Meta-Analysis, 2:75

Reddon, John C. (with Jackson, Douglas N., and Schopflocher, Donald). Distribution of the Determinant of the Sample Correlation Matrix: Monte Carlo Type One Error Rates, 4:384

Rogosa, David (with Willett, John B.). Satisfying a Simplex Structure is Simpler Than It Should Be, 2:99

Rosenbaum, Paul R. (with Rubin, Donald B.). Discussion of "On State Education Statistics": A Difficulty with Regression Analyses of Regional Test Score Averages, 4:326

Seaman, Samuel L. (with Algina, James, and Olejnik, Stephen F.). Type I Error Probabilities and Power of the Rank and Parametric ANCOVA Procedures, 4:345

Serlin, Ronald C. (with Levin, Joel R.). Teaching How to Derive Directly Interpretable Coding Schemes for Multiple Regression Analysis, 3:223

Smith, Philip J. (with Choi, Sung C., and Gunel, Erdogan). Bayesian Analysis of a 2×3 Contingency Table With Both Completely and Partially Cross-Classified Data, 1:31

Stegman, Charles E. Statistical Consulting in the University: A Faculty Member's Perspective, 3:269

Tatsuoka, Kikumi K. A Probabilistic Model for Diagnosing Misconceptions by the Pattern Classification Approach, 1:55

Wainer, Howard (with Holland, Paul W., Swinton, Spencer, and Wang, Min Hwei). On "State Education Statistics," 4:293

Wilcox, Rand R. On Comparing Treatment Effects to a Standard When the Variances are Unknown and Unequal, 1:45

Key Word Index

(Volume 10)

ACT 4:293
Aggregation 4:326
AIC criterion 1:31
ANCOVA, 4:345
Ana'ysis of covariance 3:197
ANOVA 1:19
Application statistics 3:283

Bayesian statistics 1:31
Brazil 3:283

Classroom demonstrations 3:239
Coded variables 3:223
Common item equating 2:143
Confidence intervals 3:211
Correlation 4:384
Course 3:283
Covariance adjustments 4:326
Curriculum 3:283

Design matrices 1:19
Discrimination function 1:55

Effect size 3:173
Effect size data 2:75
EM algorithm 1:31; 2:109
Empirical Bayes estimation 2:75
Equipercentile equating 2:143

Factor analysis 2:133
Faculty prospective 3:269

Generalizability theory 1:19
Growth curves 2:99

Highest posterior density region 1:31

Incomplete data 1:31; 2:109
Instruction 3:239
IRT-based quotient indices 1:55
Item response theory 1:55

Latent variable 2:121
Latin America 3:283
Least squares 3:197
Linear equating 2:109
Linear models 3:197
Linear regression 3:211
LISREL 2:161
Longitudinal analysis 2:161
Longitudinal data analysis 2:99

Mastery testing 4:334
Maximum likelihood 2:75
Measurement invariance 2:133
Meta-analysis 2:75
Method of moments 1:31
Minimax procedure 4:334
Misconceptions 3:252
Mixed linear models 2:75
MIVQUE 1:19
Model comparisons 3:197
Models with structured means 2:161
Monte Carlo 4:384
Multiple regression 3:223
Multivariate analysis 4:293
Multivariate probit 2:121
Myths and misconceptions 3:252

Observational studies 4:326
One-sample case 3:211

Paired samples 4:368
Pattern classification 1:55
Point estimates 3:211
Posterior probability 1:31
